The price of equity securities fluctuates based on changes in a company's financial condition and overall market and economic conditions. If the market prices of the equity securities owned by the fund fall, the value of the fund will decline. The prices of securities the sub-adviser believes are undervalued may not appreciate as anticipated or may go down. Applying the sub-adviser's ESG criteria to its investment analysis for the fund may impact the sub-adviser's investment decisions as to securities of certain issuers and therefore the fund may forgo some investment opportunities available to funds that do not use ESG criteria. Securities of companies with what are defined by the sub-adviser as having favorable ESG characteristics may shift into and out of favor depending on market and economic conditions, and the fund's performance may at times be better or worse than the performance of similar funds that do not use ESG criteria or that apply different ESG criteria. ESG is not a uniformly defined characteristic and applying ESG criteria involves a subjective assessment. ESG ratings and assessments of issuers can vary across third-party data providers. These risks are described in more detail in the prospectus.
