Hypothetical growth of \$10,000 investment since inception

Class R4 without sales charge 09/11/2000 to 03/31/2025

The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund on commencement of operations. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any applicable sales charges or redemption fees, which would lower these figures. This chart is not intended to imply any future performance of the fund.

The data shown represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Please see transamerica.com for performance data current to the most recent month-end. The investment return and principal value of mutual funds will fluctuate over time so that shares, when redeemed, may be worth more or less than their original cost. Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Performance for other share classes will vary.

There are no sales charges for Class R4 or Class R. Class R shares are only available through eligible retirement accounts.

Performance figures reflect any fee waivers and/or expense reimbursements by the Investment Manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the Investment Manager. Contractual arrangements, if any, have been made with Transamerica Asset Management, Inc. through 3/1/2026.

Risk measures are in comparison to the fund's blended benchmark unless otherwise indicated. Based on Class R4 for the 3-year period. **Alpha** is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility. **Information Ratio** is a ratio of portfolio returns above those of a benchmark compared to the volatility of those returns. **Sharpe Ratio** is a risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. **Tracking Error** is the difference between the price behavior of a fund and the price behavior of a benchmark. The **30-Day SEC Yield** is computed in accordance with a standardized method prescribed by rules of the SEC. The 30-Day SEC Yield is computed by dividing the fund's investment income per share earned during a particular 30-day base period by the maximum offering price per share on the last day of the base period, and then annualizing the result. The 30-Day SEC Yield is calculated at each month end and updated within the first ten business days of the following month. Be advised that the 30-Day SEC Yield calculation does not account for return of capital. Please refer to the most recent Annual Report for additional information regarding the composition of distributions. The subsidized 30-Day SEC Yield reflects the reimbursements or waivers of certain expenses. Had fees not been waived and/or expenses reimbursed, the yield would be lower. The unsubsidized 30-Day SEC Yield does not reflect reimbursements or waivers of expense fees.

The S&P 500®, and Transamerica Asset Allocation Long Horizon Blended Benchmark (66% Russell 3000® Index, 24% MSCI World Index ex-U.S., 4% Bloomberg US Aggregate Bond Index, 2% Bloomberg US Treasury Inflation Protected Securities Index, 2% ICE BofAML High Yield Master II Index, and 2% ICE BofAML U.S. 3 Month Treasury Bill Index) are unmanaged indices used as general measures of market performance. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses. “Russell®” and other service marks and trademarks related to the Russell indexes are trademarks of the London Stock Exchange Group companies. Asset allocation, like many investment strategies, offers no guarantee of positive returns, and mutual funds are subject to market risk, including loss of principal. Global/international stock funds and specialty/sector funds are subject to additional market risks. Fees associated with a fund-of-funds may be higher than with other funds. An investment in the fund is subject to the risks associated with the underlying funds including fixed income investing which is subject to credit risk, inflation risk, and interest rate risk. Investment in small- and medium-sized companies present additional risks such as increased volatility because their earnings are less predictable, their share price more volatile, and their securities less liquid than larger or more established companies. Shares may be sold (or “redeemed”) on any day the New York Stock Exchange is open for business. Proceeds from the redemption of shares will usually be sent to the redeeming shareholder within two business days after receipt in good order of a request for redemption. However, Transamerica Funds has the right to take up to seven days to pay redemption proceeds, and may postpone payment under certain circumstances, as authorized by law. **Mutual funds are subject to market risk, including loss of principal.
